Maybe some nitpicker will say the quote doesn't technically address cancer, since the topic is noncancer. But the principle really does apply to both...

That is good! I will add it as a bullet point. It is easier to cite a hidden quote as compared to a non-existent quote!  
Thanks!

OK. Thanks for your input. I may delete the last two bullets since these points might not be as pertinent. I guess I don't really have a clear preference on what to do on this issue...but I suppose it is a good idea to follow the SAB advice unless we have a good reason not to. Although I imagine we will have to make sure we are doing things consistently across iris.

I'll CC: you when I forward these points to Ravi (today or tomorrow).

Hi Karen, do you have suggestions/revisions for this comment/response outline?

## Ex. 5 Deliberative Process (DP)
